Emmanuel Ewans rd Abuja.

SOFTWARE ENGINEER

Highly skilled software engineer with 6 plus years of experience in Software Engineering, with proven expertise in developing low latency applications with remarkable user experiences and integrating 3rd party Apis to build robust backend servers.

KEY COMPETENCIES

NodeJs	Postgresql	GIT workflows
Python	Reddis	MongoDB
Typescript	Docker	AWS

PROFESSIONAL EXPERIENCE

MyBizSolutions (Technical Lead Hempay Finance)   22/04/25 - Present
-Led the backend development of Hempay's core financial services platform, delivering scalable APIs and microservices for transfers, scheduled transfers, and virtual card integrations.
-Architected and implemented secure money transfer and bill payment systems, ensuring compliance with financial transaction standards and best practices.
-Integrated third-party virtual card APIs and payment gateways, enabling seamless card issuance and real-time transaction monitoring.
-Spearheaded the development of scheduled transfer features with robust scheduling and retry mechanisms for improved user experience.

Bitnob Software Engineer (Contract)   14/10/24 - 31/03/25
-Transformed Bitnob's static documentation into a dynamic system by implementing custom Markdoc syntax and integrating a headless CMS. -Empowered content writers to seamlessly contribute to the documentation, streamlining collaboration and reducing developer dependency. --Designed and deployed reusable, modular components in Markdoc to support dynamic content rendering and maintain consistency across documentation.

Travella.io   04/01/22-11/06/23
Backend Engineer
- Contributed to the development of the logistics infrastructure, resulting in a steady increase in the daily delivery of goods peer to peer by 65% over the course of 8 months.
-- Implemented a virtual wallet system, increasing user engagement by enabling the funding of in-app wallets, and improving user experience by enabling seamless payments and achieving growth in overall app usage.
-Collaborated with frontend engineers, designers and product managers to ensure seamless delivery of the team'sproducts resulting in a 70% increase in on-time product delivery.

Settle   02/01/21-6/12/22
Backend Engineer
-Collaboratedwitha team to solve the problem of house hunting around campus making the process much less stress-free. This resulted in students settling much faster and also finding potential roomates easily via the platform.

HNG (Internship)   10/04/21-6/08/21
Backend Engineer
Contributed to the development of a slack clone by:
-Writing the global error handler
- Collaborated with hundreds of developers across the continent, enhancing skills in working under pressure and in teams, resulting in overall growth and development.

Nasarawa State University
BSc. Computer Science
